Noureldin Osama Fathy Elanany

AI ENGINEERING INTERN | PYTHON | LLMs | NLP

Cairo, Egypt | +20 112 998 2673 | elananynour@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Recent Artificial Intelligence graduate with practical project experience building Python-based NLP and LLM applications. Developed healthcare-focused review analysis and retrieval-augmented generation (RAG) workflows, text-classification models, and semantic retrieval components. Familiar with data preparation, embeddings, vector search, prompt-grounded generation, and lightweight AI application interfaces. Seeking an AI Engineering internship to contribute to real-world healthcare technology projects.

TECHNICAL SKILLS

Programming: Python
AI / Machine Learning: LLMs, Retrieval-Augmented Generation (RAG), NLP, text classification, sentiment analysis, semantic search, embeddings, LSTM, BiLSTM, CNN-LSTM
Libraries & Frameworks: scikit-learn, TensorFlow/Keras, PyTorch, Sentence Transformers, LangGraph, FAISS, ChromaDB, pandas, NumPy
Applications & APIs: Gradio, Streamlit, Flask, OpenRouter API

EXPERIENCE

Data Collector, Engineering Team | NOVEGATES | *Jun 2026 – Oct 2026*
- Worked in a data-collection role within the Engineering team.

AI Engineering Trainee | NamaSoft | *Jul 2025 – Nov 2025*
- Completed a four-month AI Engineering training program.

SELECTED AI & NLP PROJECTS

WebMD AI Pipeline: ML, NLP & RAG | *Python, scikit-learn, BiLSTM, ChromaDB, OpenRouter* | GitHub
- Built a healthcare-review pipeline spanning data cleaning, drug-effectiveness classification, review sentiment analysis, and RAG-based question answering over WebMD drug reviews.
- Combined word- and character-level TF-IDF features with a BiLSTM for sentiment classification; implemented vector retrieval with optional drug and condition filters before LLM-based Arabic summaries.

WebMD Review RAG Application | *Python, Gradio, Sentence Transformers, FAISS* | GitHub
- Developed a Gradio interface to index WebMD review data and query retrieved review passages; implemented chunking, metadata-aware embeddings, semantic top-k retrieval, and context-grounded response generation.

Dynamic LLM Routing System | *Python, LangGraph, Sentence Transformers, Streamlit* | GitHub
- Implemented query-complexity routing across model tiers, semantic response caching, and retry/fallback logic; added a Streamlit interface for single-query and batch testing.

Arabic Retrieval-Augmented Q&A System | *Python, Flask, FAISS, TF-IDF, Transformers* | GitHub
- Built an Arabic question-answering application combining semantic and keyword retrieval, context re-ranking, answer generation, and response validation.

EDUCATION

Bachelor's Degree, Artificial Intelligence | Faculty of Artificial Intelligence, Benha University | *2022 – 2026*

CERTIFICATIONS & TRAINING

NVIDIA — Rapid Application Development with Large Language Models (LLMs), Aug 2025 • NVIDIA — Getting Started with Deep Learning, Aug 2025 • NVIDIA — Building LLM Applications with Prompt Engineering, Jan 2025 • National Telecommunication Institute (NTI) — Computer Vision Training, Jul–Aug 2025 (98%) • Udemy — Python Data Science Fundamentals: Getting Started, Aug 2025 • Udemy — The Python Programming A-Z Definitive Diploma, Feb 2024

LANGUAGES

Arabic: Native | English: B1 (Intermediate)
